

ADJUSTABLE ANGLE GUIDE PLATE WFP ANG

02-2026/V1

Description

The adjustable angle guide Wfp ANG is designed to adjust the rail gauge without exchanging the angle guide plate.

Furthermore it positions the rail clip correctly and ensures electrical insulation.

Material

The adjustable angle guide plate Wfp ANG is manufactured from PA6GF30

Technical aspects of adjustable angle guide plate Wfp ANG

- » Moisture Content – 1.00 - 2.50 % in weight
- » Carbon Black Content – 0.50 and 1,0 %
- » Impact Strength – $\geq 40 \text{ kJ/m}^2$ according to EN ISO 1791 eU
- » Gauge adjustment without exchange – $\pm 10 \text{ mm}$ ($\pm 5 \text{ mm}$ per rail)
- » Specific volume resistivity – $\geq 10^8 \Omega\text{cm}$
- » Requires special sleeper recess
